

Building a stronger  
investment portfolio  
with Equimax  
participating  
whole life  
insurance

## Your financial advisor can help you put plans in place to meet your investment goals and risk tolerance.

This includes selecting the right combination of fixed income investments, equity securities, and life insurance. Life insurance? That's right!

Adding a permanent participating life insurance policy to your financial plans can help improve the rate of return and reduce the risk in your investment portfolio.

## What can life insurance bring to your investment plan?

### Diversification

Part of the premium for participating whole life insurance flows into Equitable's participating account and is invested. You benefit from a diversified mix of investments including a significant fixed-income portfolio for stability; and a combination of non-fixed investments including equities for long-term growth. You are eligible to participate in the earnings of the participating account through dividend payments.<sup>1</sup>

### Guarantees

Once a dividend is paid, it is 100% vested and can never be taken away. Plus, the cash value of the policy will never decrease, regardless of market conditions.<sup>2</sup>

### Rate of return

Dividends that accumulate within the policy grow on a tax-advantaged basis. This offers the potential for a higher rate of return than non-registered savings vehicles that are taxed annually.

### Liquidity

Access to the cash value<sup>3</sup> without the time restrictions of locked-in investments or the market volatility of equities.

### An instant legacy

Tax-free payment at death to your beneficiary(ies).

<sup>1</sup> Dividends are not guaranteed. They could change and be different based on how well the investments do, how many claims are made, and other factors. Dividends are paid at the sole discretion of the Board of Directors. <sup>2</sup> Assuming no policy loans or automatic premium loans, which will reduce the cash value of the policy. <sup>3</sup> Policy loans from cash value may be subject to income tax and a tax reporting slip may be issued if the cash surrender value (CSV) exceeds the adjusted cost basis (ACB) at the time of the loan.

## **Life insurance allows you to spend your money**

A life insurance policy not only helps you build wealth ... it gives you the freedom to spend your wealth by eliminating the need to earmark assets to leave to your heirs. Plus, it can provide a tax-efficient transfer of wealth from one generation to the next.

# Equimax<sup>®</sup> whole life

## Case study

## Meet John and Bill

John and Bill are both 45 years old. They are looking for a tax-efficient way to leave an inheritance for their heirs and build wealth they can access to supplement their retirement income. They have maximized their registered investments and currently have \$750,000 in non-registered savings. They can each afford to spend \$30,000 annually for the next 20 years and are considering their options.

## Two solutions

- John buys a \$1,000,000 Term 20 life insurance policy which will not be renewed.<sup>4</sup>
- Bill buys a \$750,000 Equimax<sup>®</sup> participating whole life insurance policy, 20 pay, with a \$250,000 Term 20 rider (for a total of \$1,000,000). The term rider will not be renewed.<sup>5</sup>

	John	Bill
Amount available to spend (annual)	\$30,000	\$30,000
Life insurance premium (annual for 20 years)	\$1,570	\$25,082
Allocation to existing non-registered savings (annual)	\$28,430	\$4,918
Net estate value at age 65 (retirement)	\$1,925,670 <ul style="list-style-type: none"><li>• Life insurance: \$0</li><li>• Savings: \$1,925,670<sup>8</sup></li></ul>	\$2,827,236 <ul style="list-style-type: none"><li>• Life insurance: \$1,507,089<sup>6,7</sup></li><li>• Savings: \$1,320,147<sup>8</sup></li></ul>
Net estate value at age 85 (death)	\$1,925,670 <sup>9</sup>	\$2,678,957 <sup>9</sup>

# The results

- Both solutions provide John and Bill the opportunity to leave an inheritance for their families AND access money from their non-registered savings.
- Bill can withdraw almost 85% more in annual income as John to supplement his retirement income.

## Why the difference?

- John's withdrawals are limited to the interest earned on his savings, in order to keep the \$1,925,670 principal intact as an inheritance for his heirs
- Bill's life insurance policy provides a \$2,678,957 inheritance for his heirs, allowing him to withdraw all his savings.

# How changes in interest rates can affect the values

Values shown in this concept are based on assumptions that are not guaranteed. Dividend scales can change and so can returns in non-registered investments. The following table shows how a reduction of 1% in the dividend scale interest rate and the rate of return on the non-registered investment affects the net estate value and annual income provided under each solution.

	John	Bill
Net estate value at age 65 (retirement)	\$1,783,943 <ul style="list-style-type: none"><li>• Life insurance: \$0</li><li>• Savings: \$1,783,943<sup>12</sup></li></ul>	\$2,572,320 <sup>10</sup> <ul style="list-style-type: none"><li>• Life insurance: \$1,363,493<sup>10,11</sup></li><li>• Savings: \$1,208,827<sup>12</sup></li></ul>
Net estate value at age 85 (death)	\$1,783,943 <sup>9</sup>	\$1,991,270 <sup>10</sup>
Annual withdrawal from non-registered savings for 20 years (starting at age 65)	\$32,919	\$71,726

**Bill's solution still allows him to withdraw a higher annual amount to supplement his retirement income. Who would you rather be? Contact your financial advisor to find out more.**

<sup>4</sup>Term 20 policy not renewed. Premiums paid for 20 years only. Exact premium is \$1,569.95 based on male, age 45, standard non-smoker rates as of October 5, 2024. <sup>5</sup>Equimax Estate Builder®, 20 pay. Paid-up additions dividend option. Exact annual premium including the Term 20 rider is \$25,081.95 based on male, age 45, standard non-smoker rates as of October 5, 2024. The term rider is not renewed and premiums are paid for 20 years only. <sup>6</sup>Illustrated values are based on the current dividend scale remaining unchanged for the life of the policy. Dividends are not guaranteed and are paid at the sole discretion of the Board of Directors. Dividends may be subject to taxation. Dividends will vary based on the actual investment returns in the participating account as well as mortality, expenses, lapses, claims experience, taxes, and other experience of the participating block of policies. <sup>7</sup>At age 65, Bill's life insurance policy under the current dividend scale assumption has \$716,984 in total cash value that he can use as collateral for a bank loan or to take policy loans if additional income is required. <sup>8</sup>Assumes an annual rate of return of 5% in an interest only investment. Marginal tax rate of 53%. Assumes no withdrawals from the non-registered savings before age 65. <sup>9</sup>Assumes withdrawals taken for 20 years starting at age 65 were only from interest earned, not principal. <sup>10</sup>Illustrated values are based on the current dividend scale assuming a 1% reduction in the dividend scale interest rate and remaining unchanged for the life of the policy. <sup>11</sup>At age 65, Bill's life insurance policy under the current less 1% dividend scale assumption has a cash value of \$636,283. <sup>12</sup>Assumes a reduction in the annual rate of return to 4% in an interest only investment. The case study in this document is for illustration purposes only. Actual results will vary.

# About Equitable

At Equitable we believe in the power of working together. This guides how we work with each other. How we help our clients and partners. And how we support the communities where we live and work.

Together, with partners across Canada, we offer Individual Insurance, Group Insurance and Savings and Retirement solutions. To help our clients protect today and prepare tomorrow.

We believe the world is better when we work together to build an Equitable life for all.
