

Equitable Generations™ universal life investor profile questionnaire

Universal life combines the benefits of tax-advantaged* life insurance protection with competitive savings and investment options.

Three steps to selecting your ideal investment portfolio:

- 1 What's your investor profile?
 Complete the questionnaire
 to help determine your
 financial goals and timeline
 to achieve those goals.
- 2 Interpret your score
 Consider how comfortable
 you are with investment risk.
 For example, will you lose
 sleep over investments that
 fluctuate in value?
- 3 Design your portfolio
 Create a balanced portfolio
 that suits your financial needs
 through a mix of asset classes.

Designing your savings and investment portfolio

Our wide investment selection available with universal life is ideal for building a portfolio that is suitable for conservative investors to those looking for more aggressive growth...and everyone in between. You can invest in any combination of the following:

- Daily interest account:
 Earns interest in a manner similar to a savings account.
- Guaranteed deposit accounts:
 Available in terms of 1, 5 and 10 years.
- Linked interest options:

 Non-registered accounts that enjoy tax-advantaged growth* with performance that reflects domestic, global equity, or bond markets.

What is asset allocation?

Asset allocation is the process of determining which asset classes (guaranteed investments, fixed income, equity) should be included in your policy and in which proportions. Each asset class has a different level of risk and return and reacts differently to market conditions. The goal is to find the mix that provides you with a balance between risk and potential return that won't keep you awake at night. Proper asset allocation may help to reduce volatility within your portfolio while increasing the potential for higher returns.

^{*} Subject to maximums and other restrictions as prescribed in the *Income Tax Act (Canada)*

Name:

Step 1: What's your investor profile?

This questionnaire can assist in finding the portfolio that best fits your time frame, financial goals and the amount of risk you are willing to assume. Choose the option best suited to you. Answering the questions honestly will help your advisor recommend an investment mix unique to your situation.

a. I contribute to RRSPs but am nowhere near my maximum limit b. I faithfully maximize my RRSPs every year c. I do not regularly contribute to my RRSPs d. I am currently drawing an income from my registered funds 2. What is the primary reason for purchasing this type of insurance? a. To provide an income for my dependents and/or cover my final expenses (funeral costs, legal fees, income taxes) in the event of my death b. To create or preserve an estate for my beneficiaries c. To maximize my tax-advantaged investment opportunities d. To accumulate wealth that can be transferred tax-free to my beneficiaries upon my death e. To achieve both life insurance protection and tax-advantaged investment growth 3. What are your goals with respect to the savings portion of your policy? a. Grow my savings safely to be used for emergency purposes only b. Assist in paying the ongoing insurance costs of my policy c. Build enough cash value to provide additional income during retirement d. Maximize the growth potential of my investments to use as I see fit in the future e. Attempt to grow my savings to keep pace with inflation 4. When do you plan to access the investment portion of your policy? a. Within 9 years b. 1 to 14 years c. 15 to 19 years d. More than 20 years e. Never 5. Which best describes your savings and investment knowledge? a. Novice. My knowledge of investing is limited b. Beginner. I have been investing for a few years and have a basic understanding of investing c. Good. I have a working knowledge of the major characteristics of the different types of investments as well as the insurance and financial marketplace d. Very Good. I have been investing for some time and have a solid understanding of insurance concepts, the different types of investments and their associated risks e. Excellent. I am a seasoned investor. I have a comprehensive understanding of insurance concepts, the different types of investments do you own or have you owned in the past? (selec	1. Tell u	is about your RRSP planning.

I have reviewed the questionnaire with my advisor.	Date (dd/mm/yyyy)
 I have reviewed the questionnaire with my client.	

This investment profile questionnaire is intended to provide you and your financial advisor with suggested savings and investment mix selections within a universal life insurance policy. This information does not constitute legal, tax, investment, or other professional advice. It is strongly recommended that you speak to your financial advisor or other professional regarding your individual insurance, savings and investment goals. While Equitable has made every effort to ensure the accuracy of the information presented here, the policy contract governs in all cases.

Step 3: Design your portfolio

Below you'll find suggested portfolios for each investment profile category. Design your own portfolio by choosing from a combination of guaranteed investments, fixed income or equities in the proportions recommended. Or, for a simpler approach, select the portfolio interest option that best fits your profile.

Investment profile categories

1. Minimal Risk - 0 to 25 points 100% Guaranteed (Guaranteed/Term Deposit Accounts)

If you would like further details on the savings and investment opportunities available with your universal life plan, please talk to your advisor.

The linked interest options available with your universal life insurance policy offer exposure to both equity and fixed income markets. While linked interest options may provide the potential for greater rates of return over the long term, there is an inherent risk in selecting them as investment options. Unlike the daily interest account or the guaranteed deposit accounts where there are guarantees with respect to the credited interest rates, investments in the linked interest options are NOT GUARANTEED. It is possible to receive negative interest, which will result in a decrease to your account value. You should ensure that there are always sufficient funds to cover the monthly charges, including cost of insurance, administration and any riders and benefits. Linked interest options are NOT mutual funds, segregated funds, indices, or other investment funds; you are NOT investing in or acquiring units in an investment fund or other security. You are placing funds on deposit, earning interest, with the general funds of Equitable, Past performance does not guarantee future results. You may be credited positive or debited negative interest depending on the performance of the underlying $fund or index \ being \ tracked. The \ underlying \ fund or index \ being \ tracked \ may \ change \ at \ any \ time. Linked \ interest \ option \ administration \ fees \ may \ apply.$
