Investment Profile Categories

Investor Style	Investment Options	
Minimal risk You have a very low tolerance for risk. You are unable to tolerate any investment losses or you have a very short investment time horizon. You prefer knowing that your capital is safe. You are willing to accept lower returns to protect your capital.	100% Guaranteed (Daily Interest, Guaranteed Interest, Term Deposit Accounts)	
Conservative You have a low tolerance for risk and potential loss of capital. You have a short investment time horizon. You are willing to accept some short term fluctuations. You accept small losses in your investment portfolio in exchange for modest returns. The primary objective of your investment portfolio will be to provide income by investing primarily in funds that invest in fixed-income securities. Capital appreciation is not a priority. A small portion of your portfolio may be invested in equity funds to provide the potential for some growth to offset the effects of inflation.	30% Equity, 70% Fixed Income or Guaranteed	
Moderate Conservative Your tolerance for portfolio volatility and loss of capital is low. You are willing to tolerate some short-term fluctuations in your investment returns. You accept small losses of capital in exchange for modest potential capital appreciation.	40% Equity, 40% Fixed Income, 20% Guaranteed	
You have a moderate tolerance for risk and loss of capital. You are willing to tolerate some fluctuations in your investment returns. You will accept moderate losses of capital. You have at least a medium term investment time horizon. The objective of your portfolio will be to provide a combination of income and long term capital growth. Your portfolio will include at least 40% in fixed income investments.	60% Equity and 40% Fixed Income	
Growth You have a high tolerance for risk and loss of capital. You are willing to tolerate large fluctuations in your investment returns. You are willing to accept moderate to large losses of capital in exchange for potential long-term capital appreciation. You do not have any significant income requirements from your investments. You have at least a medium term investment time horizon.	80% Equity and 20% Fixed Income	
Aggressive Growth Your tolerance for risk, portfolio volatility and investment losses is very high. You are willing to tolerate potentially significant and sustained price fluctuations. You are willing to accept large losses of capital. You have extensive investment knowledge. You have no income requirements from your investments and have a long investment time horizon.	100% Equity	

If you would like further details on the savings and investment opportunities available, please talk to your advisor.

Any amount that is allocated to a segregated fund is invested at the risk of the owner and may increase or decrease in value. Segregated fund values change frequently and past performance does not guarantee future results. Professional advice should be sought before an investor embarks on any investment strategy. Investors do not purchase an interest in underlying securities or funds, but rather, an individual variable insurance contract issued by Equitable.

Before you invest, it is important to understand your attitude towards risk. Knowing your tolerance for risk can help you choose an appropriate portfolio. There is no right or wrong decision. The only decision is what is right for you. Your financial goals and objectives, investment time horizon and attitude towards risk can define you as an investor and can help you identify your investor style.

Please answer the following questions by choosing the option best suited to you. There are no right or wrong answers. Keep in mind that it is important to answer each question honestly. This way the results reflect your unique investment profile.

		Risk Tolerance	
1. Which	sta	tement best describes your investment knowledge?	Score
	a)	Novice. My knowledge of investing is limited. (2)	
	b)	Good. I have a working knowledge of the major characteristics of the different types of investments and the financial marketplace. (3)	
	c)	Excellent. I am a seasoned investor and have a comprehensive understanding of the different types of investments, their associated risks and how they relate to market volatility. (4)	
2. What	is yo	ur total gross annual household income?	Score
	a)	Less than \$30,000 (0)	
	b)	\$30,000 to \$59,999 (1)	
	c)	\$60,000 to \$99,999 (2)	
	d)	\$100,000 to \$149,999 (3)	
	e)	Over \$150,000 (4)	
3. When		cribing your investment objectives, which statement is most important to you in achieving ?	Score
	a)	Preserving the current value of your investment (0)	
	b)	Producing income with relative stability of principal (1)	
	c)	Producing a moderate level of income and/or some growth over time (2)	
	d)	Growth in principal over time (3)	
	e)	Maximum growth in the value of my investments (4)	

a) My financial situation is somewhat unstable.(0) b) My situation is stable but I need savings to supplement my income.(1) c) I do not currently need my savings and investments to meet current income requirements. However, this might change.(2) d) I do not use my savings and investments to meet current income requirements. However, I may need to access funds if an unexpected emergency arises.(3) e) I have sufficient cash flow to meet my income requirements including emergencies. (4) f) I am completely secure and I can meet emergency requirements without withdrawing money from my long-term investments. (5) 6. Choose the statement that best describes your attitude towards investing and inflation. a) I want my investments to be safe and protected even if it means that my investments will not keep pace with inflation. (0) b) I am willing to accept a low level of fluctuation in the value of my investments in order to attempt to keep pace with inflation. (2) c) I am willing to accept a moderate level of fluctuation in the value of my investments in order to attempt to achieve investment returns somewhat higher than inflation. (3) d) I am willing to accept a high level of fluctuation in the value of my investments in order to attempt to achieve investment returns somewhat higher than inflation. (4) d) I am willing to accept a high level of fluctuation in the value of my investments in order to attempt to achieve investment returns somewhat higher than inflation. (3) d) I am will investment to will with a 25-year track record of strong performance. After two years of volatile markets you receive your statement in the mail that your original investment is now worth \$61,000. What would you do? a) I would sell. I could not take the chance that this investment would decline further. (0) b) I would hold on. I understand markets fluctuate and would re-evaluate in one year. (2) c) I would buy more of this investment. I have many years before I require this investment and believe in its long-term track record.
